About me

I am currently working as a Software Engineering at Vodafone in their future comms team. My current interests are in programming and software development. I have experience in Java, Vb.net, python, HTML, CSS, JavaScript, C++ and more. Independent projects I've taken part in have usually been related to programming solutions that are research based.

Recent Project:

Decompiling EVM bytecode to C

<https://github.com/kristielGJ/DecompilingEVMtoC>

Academic proposal supervised by Martin Nyx Brain and Michał Król. The project is a decompiler that converts EVM byte code (Ethereum byte code) into C which can be handled by CPROVER tools. This could enable us to identify hidden bugs in EVM code such as Solidity programs.

Education

City University of London : Computer science
BSc Hons (2019-2022)

Grade: First Class 1:1

Woodhouse College : A level : (2017 - 2019)

Grades: 128 UCAS Points

(Art, Computer science, Psychology, Maths)

Enfield County School GCSE (2012 - 2017)

Grades: A*- B (8-6)

(Maths , English, Science, Additional Science,
Computer Science , Sociology , Art , Spanish)
